DIGITAL TIP

How to keep your banking details safe

1. Never give your banking details to anyone, not even your family members or friends. Your bank or any other official organisation will not contact you by phone or via email, text message or social media to ask you for your banking details or to send a link to log in to netbank.
2. When you want to log in to netbank, always write the official web address of the netbank on your browser (e.g. nordea.fi, danskebank.fi, s-pankki.fi, op.fi). Do not use Google or other search engines for logging in – they might navigate you to a scam page. Using official mobile apps for netbanking is always safe.
3. Never confirm payments or transactions you haven't made. Check that all the information in the confirmation request matches the transaction you are making at the current moment.
